SERIOUS ABOUT HAPPINESS

A happier school experience with sound-proofed working spaces

Serious about happiness

Our products including pods, phone booths and soundproof private spaces solve noise and privacy issues in open offices, making employees happier and more productive in dozens of the world's leading companies, including Microsoft, Puma and Tesla. In fact, 40% of all Forbes 100 companies use Framery.

Where to place them

Flexible multipurpose spaces

Thanks to their small size and sound-proofing, Framery can enhance the usability of school spaces. Excess floor space in the classrooms and the hallways can be turned into multipurpose spaces. The pods can be moved as needed. Teachers have given us feedback on how Framery has given them new tools for maintaining a peaceful working environment.

For classrooms, entrance halls, and corridors

Framery is an excellent one-class multipurpose space, when placed in a classroom. When placed in the corridor, Framery can serve the needs of several classes.

Transparency

The opposing walls of Framery are made of glass. Thanks to transparency, the class can be monitored and the space feels open. Transparency helps create a safe learning situation.

Excellent sound-proofing

The sound-proofing of Framery products allows for many actions to take place in the same space. The sound-proofing is so good that, in the same classroom, some of the students can be working noisily at their desks and the others can enjoy the silence in Framery.

Near the students / at the heart of teaching

All Framery products are designed to use space as efficiently as possible. They feel spacious from the inside, but are small on the outside. For example, Framery Q requires only 2.6 m² of floor space. This is why Framery can be placed such places as classrooms, corridors, and entrance halls. When the space is available nearby, no time is wasted on moving around, and teaching can be monitored easily.

A space for all students

Framery is a space that the students enjoy using. It is a positive improvement for classrooms, one that all students want to use, whether they are advanced, special needs, sensitive to stimulus, or regular students.

Privacy

Thanks to its sound-proofing, all the discussions and phone calls handled inside Framery remain private. The space can be used, for example, to conduct confidential discussions with teachers, students, or parents. Using the space allows for better privacy and security.

Quieting down

Framery is a functional and safe space that can be used for quieting down. The products are used for quieting down students who are sensitive to stimulus, to help with behavioral issues, and to solve arguments.

Space for differing needs

Framery is an excellent space for managing different needs. The pods allow the teacher to manage the different learning needs of their students. Different tasks can be handled within the classroom, in peace and quiet.

Working independently

Framery offers a space with perfect peace to work on tasks demanding concentration. The space can be used for taking an exam, for studying alone, for seeking peace to concentrate, for reading homework out loud, or for watching educational videos. The size and feel of the space invites to work in peace.

Group work

Framery can be used by several students for group work and study groups. They can be as loud as they want, but thanks to its sound-proofing, outside of it the space remains peaceful.

Noise affects learning and stress

Children's ability to concentrate suffers more than adults' when surrounded by noise.

According to neuroscientists, disruptions in concentration can affect learning results. Children find it difficult to focus in a noisy classroom. ❶ Noise can also cause physiological stress in our bodies. ❷ During school days, spoken noise is found to be especially harmful, as being constantly bombarded by it can lower our cognitive functions. ❸ Cognitively demanding tasks, such as reading, writing, and comprehension, are under threat in loud environments. Framery's sound-proofing allows for noisy work without disturbing the rest of the class. This creates a more peaceful classroom. If the classroom is noisy, it is quiet inside Framery.

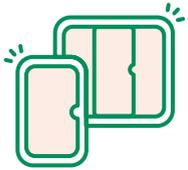

❶ Vander Ghinst et al. 2019

❷ Evans & Johnsson 2000 ❸ Hongisto 2005

“Using the pod can calm a child, because it is a closed space and it is not too big! The pod does not allow for fidgeting. The glass alleviates the feeling of being closed in a pod. Framery encourages focusing on working. Perhaps it creates a safe feeling, because it is so small?”

Besides our special needs students, our regular students also enjoy the peace. The steady hum is soothing, students have told me.”

Teacher, 5th grade

“Because of the sound-proofing, the Framery in the corridor can be used in various ways. We could use more of them. This one is occupied often. Sometimes students are taking their exams there, sometimes they are practicing their parts for music class. It is used in multiple ways, without any noise escaping to outside!”

Teacher, elementary school

“I have students that are stressed just by moving from one space to another, from one class to another. Their stress levels are alleviated by being able to spend fifteen minutes reading Donald Duck in the pod, in steady hum of the fan.”

Teacher, 5th grade

Framery Q - Suorama elementary school, Finland

Framery O

Framery O allows one person to have some privacy without leaving the classroom. The sound-proofing allows for confidentiality when a student needs to phone their parents during the school day, for example. The space is comfortable to be in and has no echo. Installation is done quickly and the product is ready to use on its day of delivery.

Solid walls, roof and floor	A sandwich element of sheet metal, birch plywood, recycled acoustic foam and acoustic felt. An anti-static and stain resistant low loop pile carpet for interior floor.
Glass	Sound control laminated glass
Frame and table	Formica laminate on birch plywood with varnish trim
Weight	320 kg / 705 lb
Airflow	Total airflow is 21,5 l/s / 77,4 m ³ /h
Measurements	221 cm x 100 cm x 100 cm (height, width, depth) 87 in x 40 in x 40 in (height, width, depth)
Installation time	0,5 h

Framery Q

Framery Q is a multipurpose working space intended for 2 to 4 people, and an excellent choice to accompany traditional classroom work. Efficient ventilation and sound-proofing create a comfortable space for group works, quiet studying, or for just having a moment to calm down. It is an excellent space for differing needs, and one that is enjoyed by both students and teachers. Thanks to its small size, it can be easily placed such places as classrooms, corridors, and entrance halls.

Solid walls, roof and floor	A sandwich element of sheet metal, birch plywood, recycled acoustic foam and acoustic felt. An anti-static and stain resistant low loop pile carpet for interior floor.
Glass	Sound control laminated glass
Frame and table	Formica laminate on birch plywood with varnish trim
Weight	Without furniture: 630 kg / 1389 lb
Airflow	Total airflow is 66 l/s / 237,6 m ³ /h
Measurements	222 cm x 220 cm x 120 cm (height, width, depth) 87.4 in x 86.6 in x 47.2 in (height, width, depth)
Installation time	3-4 h

Framery 2Q

Framery 2Q is designed to be used by 4 to 6 people. It is an excellent space for larger group meetings, group work, and brainstorming. Framery's excellent sound-proofing guarantees that group work will not disturb others and that surrounding noise will not disturb the group work. The space can be furnished with own furniture.

Solid walls, roof and floor	A sandwich element of sheet metal, birch plywood, recycled acoustic foam and acoustic felt. An anti-static and stain resistant low loop pile carpet for interior floor.
Glass	Sound control laminated glass
Frame and table	Formica laminate on birch plywood with varnish trim
Weight	Without furniture: 950 kg / 2094 lb
Airflow	Total airflow is 121,1 l/s / 436 m ³ /h
Measurements	220 cm x 235 cm x 280 cm (height, width, depth) 86.6 in x 92.4 in x 110.4 in (height, width, depth)
