Minimum recommended space for the air to circulate is 20 cm / 7.9” above the pod.

**Standard**: Power cord can be led from the floor and the ceiling.
If led from the floor, the cord length is 2.7 m / 106.3 in

**Lounge**: Power cord can be only led out of the bottom from backside of the pod, the length is 3.5 m / 137.8 in

All electric components can be changed if there is a malfunction.

Framery’s products can be plugged into a wall socket. The pods have their own power supplies that give 24 V DC to the lights and 12V DC fans. The lights and fans are operated by a motion detector. Inside the pods, there are country-specific power outlets for charging mobile devices.

#### Input and output values

- **Input:**
  - 100–240 VAC, 8.0 A, 50–60 Hz

- **Output VAC (socket):**
  - 100–240 VAC, 6.6 A, 50–60 Hz

- **Output USB (TUF) charging:**
  - Maximum combined output of 5 A at 5 VDC (25 W)

---

Power consumption is a constant value that is determined by the power usage of the pods’ internal components (electric unit, motion detector, light and fans).
Working height options

Standard table
- Table height: 72 cm / 28.3 in
- 4 power sockets + 2 charging USB sockets + HDMI socket

All Framery upholsteries are Kvadrat textiles
Framery’s Quality Management System is certified against ISO 9001 and Framery’s Environmental Management System is certified against ISO 14001. CE marking is a manufacturer’s declaration that a product meets the requirements of relevant EC directives. The EC directives for Framery O, Q and 2Q pods are: Low Voltage Directive (LVD) 2006/95/EC, Electromagnetic Compatibility Directive (EMC) 2004/108/EC, Restriction of Hazardous Substances (RoHS) Directive 2011/65/EU and Ecodesign Directive 2009/125/EC.

Acoustics

We do not give out the results of sound insulation measurements done to our products. The reason for this is that, at the moment, there isn’t a uniform way of doing these measurements. If we were to give out these results, they would likely be compared to results measured in another way. This kind of comparison would be misleading. However, we’re confident that the sound insulation of our products is the best in the product category.

ISO 23351-1 (https://www.iso.org/standard/75299.html) is a new standard that is in the final phases of ISO’s approval process. It will be the first standard that can be used to determine the level of sound insulation of furniture ensembles such as pods, and to produce a single figure, called speech level reduction (Ds), that describes it.

Material safety

We conduct emissions testing for the products every time a major update is planned for Framery products in order to be sure that there aren’t any harmful compounds volatilizing from the products such as formaldehydes or VOCs. We want to embrace transparency of the materials we use for our products and thus we have compiled Health Product Declarations ® (HPD) for our products. Our HPDs can be found and downloaded for free online from the Health Product Declaration Collaborative public repository.

Fire safety

No flammable materials are used in Framery products. The fire safety of all surface materials, upholstery and acoustics materials of the products are tested and classified by either national or international standards. EN 13501-1 classification for the used materials is the following: acoustic wool is classified B-s1, d0, acoustic felt B-s2, d0 and carpet Cfl-s1. All surface materials have also been tested against ASTM E84 / UL 723 and are classified at least as Class C. Outer frames with laminated surface are IMO certified (French Maritime Authority). Moulded foam used in Tovi stool seat meets CA TB 117:2013 requirements. Fabric meets the performance requirements of BS EN 1021-1 and 1021-2. According to Inspecta, an EU accredited inspection body, there is no need for installing sprinklers in Framery O, Q or 2Q in Europe.

Framery has conducted extensive fire testing in US for the products and results suggest that there is no need for installing sprinklers in Framery O, Q and 2Q in North America either. It is still recommended to check the requirements with local AHJ / fire inspector in North America as interpretations may differ.

Sustainability

Framery’s products consist mostly of plywood, steel, glass and acoustic materials. Plywood used in Framery products has a sustainable forestry FSC or PEFC certification. Sound dampening panels are made up to 60% and the felt panels are made up to 80% of recycled PET plastic (e.g. Plastic bottles). Significant part of all steel, aluminium and glass is recycled during their manufacturing processes. 3rd Party Certifier has conducted a Life Cycle Assessment (LCA) and compiled Environmental Product Declarations (EPD) for both Framery O and Framery Q.
