

# Framery Q

Two is company, four is a party – everyone fits

**Framery Q** office pod is a multifunctional, soundproof space for 1-4 people to have meetings, brainstorming sessions and important one-on-one conversations in private without disturbing the office – or the office disturbing you.

## Comfortable privacy for longer meetings

Suitable for meetings, brainstorming and much more. Two Maggie Sofas are always included, and you can choose them with a curved or straight backrest. There are also three different table options available.

- Frame, exterior and sofa colors
- 2 Maggie Sofas
- 3 Table options
- 3 Power sockets

## For shared videoconferences

A high table and handy bar stools make the Working With PAL interior layout very efficient for short-term sessions. The shape of the desk is suitable for teamwork for two, private sessions or video conferences. You can choose from two height options for both the table and PAL stools.

## Heads-down work

Designed for uninterrupted heads-down work. It comes with an adjustable electric table that allows you to change your working position from sit-to-stand in a matter of seconds. The Flow has plenty of space inside for a chair and even an extra stool, making it possible to invite your colleague in for a chat or a shared videoconference.

## For easy access

One of the more convenient and flexible interior alternatives for the Framery Q office pod. Low doorstep, a wider door with an automatic opener, folding chairs and table enable many different meeting arrangements and easy access with a wheelchair.

Screen not included.

All electric components can be changed if there is a malfunction. Power consumption is a constant value that is determined by the power usage of the pods' internal components (electric unit, motion detector, light and fans). Framery's products can be plugged into a wall socket. The pods have their own power supplies that give 24 V DC to the lights and 12 V DC to the fans. The lights and fans are operated by a motion detector. Inside the pods, there are country-specific power outlets for charging mobile devices.
