

# Framery 2Q

Not only a pod, but a full-sized meeting room

Framery 2Q meeting pod is designed for 4-6 people, making it the ideal place to co-create, brainstorm and have meetings. Our superior sound insulation and echo-free acoustics ensure that your meetings won't disturb the office – and the office noise won't disturb you.

## Perfect for you

How do you work best? Choose the interior layout that best suits your needs.

### Get together in comfort

Gather your team around the table for a Monday morning meeting or Tuesday afternoon brainstorming session. A meeting table with two different height options makes this interior layout optimal for laptop use or some creative collaboration. Want to dim the lighting or adjust the airflow? You can control the pod's settings from its clever control panel, located on the power column. Additional options include a display bracket or a whiteboard.

### Living room in your office

Framery 2Q Lounge interior layout provides a more casual environment for company meetings, a calm space to retreat to during the workday, or an area for socialization. Custom-designed Clint Sofa, large whiteboard, free-standing Piaggio table and a wall shelf make up for a functional yet relaxed setting. The adjustable airflow and lighting create a happy atmosphere to work in. Additional options include, for example, a display bracket on the wall for a TV or a booking system ready option for the door for reserving the pod.

### Huddle up for your next team meeting!

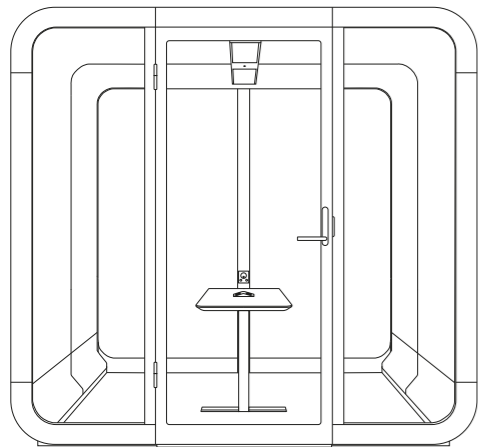

Framery 2Q Huddle is an ideal setup for your meetings, whether everyone attending is present or some are joining remotely. Gather your team of four around a spacious table where everyone fits comfortably, laptops included! The spacious pod allows you to bring in two extra chairs and everyone to move around freely. Optimize your meetings with a screen bracket and whiteboard set on the opposite wall to ensure that everyone present, physically or virtually, shares the same vision.

Optional Data Cartridge with two LAN ports available. <b>Clint sofa</b> 4 power sockets (2 under each sofa)	<b>Framery 2Q Huddle</b> 4 power sockets + USB-A+C + HDMI and an optional LAN port (replaces 1 power socket) on the table. 2 power sockets under the table.
<b>Output values</b>	<b>Output VAC (power socket):</b> 100-240 VAC, 6,6 A, 50-60 Hz <b>Output USB (TUF) charging:</b> Maximum combined output of 5 A at 5 VDC ( 25 W)		

All electric components can be changed if there is a malfunction. Power consumption is a constant value that is determined by the power usage of the pods' internal components (electric unit, motion detector, light and fans). Framery's products can be plugged into a wall socket. The pods have their own power supplies that give 24 V DC to the lights and 12 V DC to the fans. The lights and fans are operated by a motion detector. Inside the pods, there are country-specific power outlets for charging mobile devices.
